Title: Is your phone system a team player?

Abstract: RingCentral's brings communications capabilities to essential apps you use everyday. The features and functionality of the RingCentral Office cloud communication system are now accessible from your Google and Microsoft suites, is integrated with Salesforce and Zendesk and is joined with cloud storage providers, including Box and Dropbox. Learn how you can increase productivity and communicate with unprecedented flexibility, using your favorite devices.

## "Is your

**VO:** Gathering as a team is inspiring.

Communicating unites us.

An open connection between people moves us and drives us forward.

The digital renaissance has vastly expanded the capabilities of business communications; enabling your enterprise workforce to perform and deliver anytime, anyplace.

Your team's essential apps are joined with the cloud communication system that empowers you to work with ease, elegance, and efficiency.

Whether you are at the office, in your home office, or on the road, you can experience seamless communication from within your trusted software suites, cloud storage providers, and sales and support services.

The power of the cloud, joined with a flexible and creative communication system supports you, wherever you are.

RingCentral The cloud communications solution that plays well with others.
